## Printmaking

### Linoleum Block

Is carved to create a relief surface.

After it's carved, it's like a stamp and can be inked and printed.

### Linoleum Handle & Blades

There are different sizes of blades that can be inserted into the carving handles.

The blades have different numbers from 1 to 5.

1 -removes the least amount of linoleum from the block

5 -removes the most amount of linoleum from the block

### Bench Hook

- is used to Prevent or keep the block from moving around as you cut
- It is extremely important that your block touch the back of your bench hook.
- You must always cut away from yourself!
- If you have to cut in a different direction, then you turn your block so you can continue cutting safely.
- Never carve toward yourself!
